

Biotechnology

At On Assignment Lab Support, we recognize the needs and demands of the competitive and rapidly changing Biotechnology industry - with its VC funding fluctuations, partnerships, and regulatory compliance. We support our clients with dedicated local offices staffed by industry professionals, many of whom have experience working for companies that have successfully navigated from research to market. In addition to traditional DNA manipulation and genetic engineering, On Assignment Lab Support specializes in many other areas, including agriculture, bioremediation, food processing, and energy production within the Biotechnology industry.

Our clients realize one of their strongest assets is human capital and we are constantly recruiting skilled scientists that understand the stages of taking projects from initial concept through clinical trials and production. With competent and innovative people to support their research, many Biotech companies are learning they can maintain a competitive edge, while creatively dealing with the challenges of the industry. With this in mind, On Assignment Lab Support focuses on *People First* and takes pride in its hard-earned reputation for delivering the best in scientific talent.

Are you looking
for a company with **science in its DNA?**

For more than 20 years, On Assignment Lab Support has provided skilled professionals to the scientific industry. Practically inventing scientific staffing, it's still the focus that drives the company. On Assignment Lab Support specializes in finding and placing qualified scientific talent for all organizational levels; from PhDs and senior managers to people just starting their careers.

STAFFING OPTIONS

Contract - offers the ability to increase or decrease resources as needed. This option is used primarily for project-oriented work, vacation schedules and specific talent needs.

Contract-to-Hire - offers all the advantages of our contract staffing option while giving the ability to hire the candidate directly. This option is used to evaluate personnel prior to hiring.

Direct Hire - offers access to all of the resources of a professional recruitment firm, reducing the time to find candidates and hire the right person.
